

**See ya later,
refrigerator...**

...Hello \$35

Chances are, that old working refrigerator or freezer in your garage or basement is running up your electric bill. That's because it can use three to four times as much energy as a newer one.

It still works and you don't want to just throw it out...so what can you do?

Beginning March 1, 2010, you can be a part of our refrigerator recycling program. With just a call, you can arrange to have your secondary refrigerator or freezer picked up by a reputable company who specializes in recycling appliances and receive a check for \$35. It's as easy as that.

ENERGYWISESM

Use less. Spend less. Do more.

Some important things to know:

- Recycling program runs from late spring to early fall.
- Program is available to residential customers of NPPD and its participating wholesale utility partners on a first-come, first-served basis.
- Program is limited to two units per residential address and customers must own the units being recycled.
- Refrigerators and freezers are both accepted.
- Unit must be a working, secondary appliance measuring between 10 and 30 cubic feet.
- Convenient at home pickup.
- A \$35 cash incentive will be paid for each appliance.

To schedule a **FREE** pickup,
call toll-free 1-866-444-9160

Recycling by JACO Environmental

JACO Environmental are appliance recycling specialists. They will pick up working, secondary refrigerators and freezers and convert 95 percent of each into recyclable material for reuse. Toxic materials, like Freon and mercury, are extracted and rendered harmless. That's good for the environment.

This program is partially funded through the Waste Reduction and Recycling Incentive Grant Program of the Nebraska Department of Environmental Quality.
